EDUCATION

Birla Institute of Technology, Mesra 2021 – 2025
B.Tech, Computer Science and Engineering — CGPA: 8.76 *Mesra, Ranchi, Jharkhand*

TECHNICAL SKILLS

Languages: Java, Kotlin, C++, JavaScript
Backend & Distributed Systems: Spring Boot, REST APIs, Microservices, Apache Kafka, Hibernate/JPA, Liquibase, System Design
Databases: PostgreSQL, MongoDB
Tools & Practices: Git, SigNoz (Observability), Amazon S3, Data Structures & Algorithms, OOP, DBMS
AI Tools: Anthropic Claude, OpenAI GPT, Google Gemini, GitHub Copilot

EXPERIENCE

Software Engineer, Equall (LTCV Credit) Aug 2025 – Present

- Engineered the post-disbursal insurance workflow end-to-end — integrating third-party APIs for policy creation and PDF retrieval, and adding Kafka DLQ-based self-retry fallbacks for failed operations — eliminating manual processing and driving a 67% customer insurance acceptance rate.
- Owned the configurable, graph-based Top-Up loan journey engine end-to-end, cutting completion time by 80%+, and orchestrated the monthly pre-approved offer re-evaluation pipeline layered on top of it, reducing Risk Team effort by 90%+ and driving 30–35% of monthly loan disbursals.
- Delivered a server-side document generation engine (Thymeleaf, OpenHTMLtoPDF) that dynamically produces Key Fact Statements, Loan Agreements, Sanction Letters, and E-Applications, automating document generation for 200+ monthly loan applications.
- Strengthened compliance screening by integrating TransUnion's AML/PEP API using AES-256-GCM + RSA-OAEP-SHA256 hybrid encryption for applicant PII exchange, then parsing decrypted XML and Base64-encoded PDF responses into the BRE orchestration pipeline.
- Built 15+ Kotlin Multiplatform and Jetpack Compose screens for the customer mobile app — including KYC, eSign, eMandate, Banking, and Payments modules — and shipped ReactJS features with analytics event tracking for the website, together serving 40K+ users.

Software Development Intern, Samsung Research and Development Institute, Delhi Jan 2025 – Jul 2025

- Deployed a Device Guard application to 100K+ devices using the C# Tizen .NET framework, displaying real-time access restriction pop-ups based on EMI payment status.
- Cut call latency by 30% by building a doorbell caller application (Tizen .NET, One UI) enabling real-time video/audio communication, targeted for rollout on 500K+ smart devices.

PROJECTS

DWELLING — Real Estate Web Application (ReactJS, ExpressJS, NodeJS, MongoDB, Sass) (Live Demo)

- Developed a full-stack real estate platform with property listings, image uploads, interactive maps (Leaflet), and location/price/amenity search filters.
- Optimized page load time by 20% while implementing 10+ REST APIs (NodeJS, ExpressJS, Prisma) for CRUD operations, connecting Cloudinary for media storage, and layering in JWT-based authentication.

POSITIONS OF RESPONSIBILITY

- Joint Treasurer, IEEE – BIT Mesra: Managed organizational finances and coordinated coding events, hackathons, and workshops for PANTHEON'24.
- Sponsorship Lead, EDC – BIT Mesra: Secured sponsorships and executed partnership strategies for E-SUMMIT'23 and Inventor's Forge.

ACHIEVEMENTS

- Qualified for Round 3 in Walmart SparkPlug'2024 and Flipkart GRiD 6.0.
- Cleared Samsung Software Competency (SWC) Test — Advanced and Pro levels.
- Competitive Programming: LeetCode (Max Rating 1763), CodeChef (Max Rating 1440, 2★), CodeForces (Max Rating 1207, Pupil).
